

# PRINTED MATERIALS SUPPLIER DISCLAIMER

## PREFERRED PRINTING SUPPLIERS

West Coast Canning has a list of preferred shrink sleeve and pressure sensitive label suppliers that we work with in the process of producing cans for you. We have determined that the materials and production processes of these suppliers ensure the optimal performance of the shrink sleeve or pressure sensitive label once it arrives to WCC for application. These preferred suppliers are listed below:

### SHRINK SLEEVES

IMS  
Ingenious PKGing

### PRESSURE SENSITIVE LABELS

Summit Print

Please contact [Matt Human \(Matt.Human@westcoastcanning.com\)](mailto:Matt.Human@westcoastcanning.com) if you are looking to get in touch with one of our preferred suppliers and he would be happy to connect you.

## OTHER PRINTING SUPPLIERS

If you choose to use a supplier not on the lists provided above, we require the following specs to be strictly adhered to so that we may try and apply shrink sleeves or pressure sensitive labels efficiently. We can in no way guarantee that we are able to apply these sleeves or pressure sensitive labels, but will be happy to run a small sample and determine their effectiveness from there. If we are forced to run materials from another supplier due to time constraints, we will be charging additional fees for production downtime should these materials not meet the specs listed overleaf.

Max Outer Diameter - 14"

Inner Core - 3"

Rewind Direction - #4 (left side off first)

\*Please note that West Coast Canning assumes no responsibility for misprinted artwork or defective shrink sleeves or pressure sensitive labels from any supplier. Printed materials arriving to WCC are assumed to have been proofed and approved by the customer in the artwork development process with the print supplier. In the event of misprinted artwork or defective print materials, you will be contacted by WCC for confirmation of next steps.

\*Please note that if any changes are made to any re-ordered artwork (art changes, barcode updates), these must be communicated to WCC staff before the application of printed materials to cans. It is assumed that, unless otherwise communicated, re-ordered artwork is the same as the previous order and will be applied as such.

\*Please note that West Coast Canning does not provide inventory updates unless your current shrink sleeve inventories have gone below the re-order threshold based on your previous order history. We highly suggest that you keep your own inventories of shrink sleeves and pressure sensitive labels for your records and to anticipate when you will need to re-order based on your production forecasts. If you are ever wondering about shrink sleeve or pressure sensitive label inventories, please contact Matt Human ([matt.human@westcoastcanning.com](mailto:matt.human@westcoastcanning.com))
